Proposed Process

- ◆ The MSFC catalog currently has a group for ESA command activities
- ◆ Propose that we add ESA planners as group managers for this group
- ◆ Process for updates
 - ◆ ESA planner updates activities with proposed changes
 - ◆ ESA planner marks the updates as Reviewed when they are complete and informs PPM at the IEPT or via email
 - ◆ PPM approves the updates as catalog manager
 - ✦ This is a “rubber stamp”, since ESA is the expert on these activities

Benefits

- ◆ ESA maintains their own activities
- ◆ PARCs and PPMs can include these activities in our Columbus payload containers
